Rooftop Multi Support, TSP®

Rooftop Multi Support

Rooftop Multi Support

Specification

Application area:	Recessed aluminum rail (40 x 20 mm) allows easy installation and fixation with simultaneous structure-borne sound insulation of equipment, ventilation ducts and conduits on flat roofs.
Recommended accessories:	Toothed plate S with zinc-nickel coating, separating fleece for installation on roofs with PVC roofing membranes to prevent the transfer of plasticizers into the roofing membrane.
Installation advise:	The rooftop holder multi support can be screwed on as a base for rail holders or ventilation units. Two can also be used on each side to prevent larger devices from tipping over.

Technical data

Material holder:	recycled, UV-resistant rubber SBR
Material profile:	Aluminium
Temperature resistance:	-40 up to 80 °C

Remark: The permissible floor load must be checked on site. Wind and snow loads must be considered separately.
