MU-Dowel

PE

MU-dowel

Product description

- Universal use for fixings in a wide variety of substrates
- Secure hold even in cavities thanks to knotting
- The automatically folding collar during push-through installation makes the anchor multifunctional
- Anti-drip protection prevents premature expansion of the anchor during installation
- Pre- or through-hole installation
- Indoor and outdoor applications

Specification

Application area:	For concrete- and masonry material, sand-lime brick, perforated brick, porous concrete, gas concrete, plasterboard, chipboard, solid brick, gypsum and natural stone.
Recommended accessories:	Wood or chipboard screws and SDS-plus hammer drill bit
