Brass expansion anchor

Brass expansion anchor

Product description

- Brass expansion anchor for light and medium-heavy loads in many different substrates
- M8, M10 or M12 female thread is suitable for holding metric screws, threaded bolts or threaded rods
- No twisting in the drill hole thanks to the special outer surface of the anchor
- The surface finish enables very high corrosion resistance

Specification

Application area:	For concrete, solid brick, natural stone and lime sand brick.
Installation advise:	Length of screw should correspond exactly with length of anchor plus material thickness of attaching part. If the screw encounters too much resistance, drill the hole slightly larger.
Recommended accessories:	Machine screws, threaded bolts and SDS-plus hammer drill bits

Technical data

Material:	Brass

Thread	Length [mm]	Drill Ø [mm]	Drilling hole depth [mm]	Depth of anchoring [mm]	Weight [kg/pc]	Packing unit [pcs.]	Part-No.
M8	27,5	11	34	30	0,0069	100	2060043
M10	32,0	13	38	34	0,0108	100	2060051
M12	40,0	18	44	40	0,0236	50	2060078
